Professional Synopsis:

I possess over 10+ years of experience in managing all phases of dynamic web project development. Proficient in various programming languages such as Angular 13/14/15, Typescript, AG-grid, Javascript, Node js, Micro services, Django, Jenkins, HTML5, CSS3, SASS, LESS, jQuery, Bootstrap v3.3.7/4, Tailwind, Adobe XD, Adobe Photoshop, Figma, Invision, Shopify, WordPress, CMS, GitHub, SourceTree, Agile methodology, JIRA, and SVN. Additionally, I have a solid foundation in project management and fostering positive customer relationships.

Experience Summary:

Valuelabs (Hyderabad)

Designation: Senior Analyst

Duration: Feb 2022 to till date

Job Responsibilities:

As UI lead at Harris Connect Internet Product Development, I spearheaded all user interface design initiatives. This included interpreting business objectives, sprint planning, identifying high-risk areas, backlog discussion, client coordination, review of TDDs, collaborating closely with product managers to define product requirements, and proactively resolving potential user experience challenges. My role also involved conceptualizing innovative web application solutions to meet project goals.

Key Projects:

Artemis Health (US Client)

At Artemis by Nomi Health, we are striving to improve healthcare in America. Self-insured employers are leveraging their own benefits data to streamline expenses and enhance benefits for their employees. We believe that everyone should have access to affordable, quality healthcare.

Surge Learning (UK Client)

Surge Learning is a Canadian based Software as a Service (SaaS) company providing online solutions for healthcare organizations. Surge has grown incredibly since its inception and is currently the education solution for hundreds of organizations across Canada, including Long Term Care, Retirement, Acute Care, Home Care, Developmental Service and Community Care Organizations.

Skills Utilized: HTML5, SCSS, Angular 14 & 15, AG-grid, TypeScript, JavaScript, Adobe XD, Bootstrap 4, Unit test, Jenkins, Icon Library, Responsive Web Design (RWD).

Development Environment: Visual Studio, Bitbucket, NPM, Node (v18.13.0).

Achievements:

- Led front-end development for multiple products, collaborating with cross-functional teams (designers, engineers, product managers) to launch features and enhance user experience.
- Designed and maintained front-end components for multiple web projects using Angular, HTML5, CSS3, and JavaScript, TypeScript, Node.
- Wrote state-of-the-art, maintainable, and secure code to enhance site performance, security, and accessibility for millions of users.
- Worked closely with product managers and designers to translate project requirements into functional, user-friendly features, maintaining high standards for UI/UX design.

Digiflynt Tech Private Limited (Gurugram)

Designation: Senior Lead Engineer

Duration: Jan 2021 to Dec 2021

Job Responsibilities:

As a key contributor in E-Governance, I spearheaded process analysis, innovation, automation, and implementation initiatives. My role entailed end-to-end ownership of project life cycles, ensuring timely delivery and adherence to organizational objectives. I collaborated closely with diverse business analyst teams to architect comprehensive system frameworks. Through meticulous study of solution flows, I developed and streamlined standard operating procedures (SOPs) for seamless implementation. Additionally, I designed robust implementation roadmaps aligned with organizational goals, emphasizing transition to a microservices architecture across applications. As a leader, I led proactive efforts in risk identification, devising effective mitigation strategies and contingency plans to ensure project success.

Key Projects:

Digiflynt (Africa Client)

Digiflynt is engaged in few west African countries trying to execute the government's digitization program. This involves setting up a Tax Declaration system by the public at large as well as companies, VAT digitalization involving VAT declaration, collection on digital platforms, establishing PoS networks to bring digitalization to the whole country's transactions and creating e-invoicing. This also involves setting up a digitized Tax collection center and computerization of the complete operations of the Tax department.

Skills Utilized: Invision, Adobe XD, HTML, SCSS, Angular 13, Typescript, JavaScript, Bootstrap 4, Icon Library, Responsive Web Design (RWD).

Development Environment: Visual Studio, Bitbucket, NPM, Node (v13.11.0).

Achievements:

- Studying the entire solution flow and developing standard operating procedures (SOPs) for solution implementation.
- Designing and outlining the implementation roadmap for integration in line with organizational objectives.
- Transitioning to a microservices architecture for all applications.
- Establishing Agile Teams and establishing processes for Continuous Integration/Continuous Deployment (CI/CD) pipelines.
- Leading efforts to identify risks, devise risk mitigation strategies, and contingency plans.
- Deep understanding of the design process from initial concept to end product.
- Understanding and contributing to the technical solution from design through to code level.
- Excellent understanding of Interface design, highly developed color skills and design knowledge.
- Worked closely with customers, developers & designers to produce the best possible implementation of any project.
- Communicated design concepts to clients.
- Experienced in communicating with clients, vendors, and fellow employees.
- Great sense of UX along with a strong understanding of UX methodologies, product development process and design sense.
- Possess a flexible attitude and known for a continuous demonstration of high level of ownership, timely delivery of projects and for customer empathy.
- Possess strong analytical and reasoning abilities.
- Conducting and participating in task-breakdown meetings for the team.
- Process implementation and adherence by team.
- Responding to the emails/queries of the customers on time.
- Risk management.
- Taking part in service reviews with customers as required.
- Identifying and proposing opportunities for improvement to services.
- Ensuring on-time and defect free delivery.
